

ENVIRONMENTAL
CLEARANCE

Government of India
Ministry of Environment, Forest and Climate Change
(Issued by the State Environment Impact Assessment
Authority(SEIAA), Haryana)

To,

The Authorised Signatory Sr Manager
INSTAKART SERVICES PRIVATE LIMITED
Plot No 1, HSIIDC Warehousing Hub, Village Patli Hazipur, Farrukhnagar,
IMT Manesar, Gurgaon Haryana -560037

Subject: Grant of Environmental Clearance (EC) to the proposed Project Activity
under the provision of EIA Notification 2006-regarding

Sir/Madam,

This is in reference to your application for Environmental Clearance (EC)
in respect of project submitted to the SEIAA vide proposal number
SIA/HR/MIS/69653/2021 dated 16 Dec 2021. The particulars of the environmental
clearance granted to the project are as below.

- | | |
|--|--|
| 1. EC Identification No. | EC21B039HR111056 |
| 2. File No. | SEIAA/HR/2021/491. Hard copy to be submitted. |
| 3. Project Type | New |
| 4. Category | B1 |
| 5. Project/Activity including Schedule No. | 8(b) Townships and Area Development projects. |
| 6. Name of Project | Proposed Development of Logistic Park at Plot No 1, Warehousing & Transport Hub in village Patli Hazipur, Tehsil Farukhnagar in Industrial Model Township of Manesar, Gurgaon, Haryana by Instakart Services Pvt Ltd.. |
| 7. Name of Company/Organization | INSTAKART SERVICES PRIVATE LIMITED |
| 8. Location of Project | Haryana |
| 9. TOR Date | 01 Dec 2021 |

The project details along with terms and conditions are appended herewith from page no 2 onwards.

Date: 31/12/2021

(e-signed)
S. Narayanan, IFS
Member Secretary
SEIAA - (Haryana)

Note: A valid environmental clearance shall be one that has EC identification number & E-Sign generated from PARIVESH. Please quote identification number in all future correspondence.

This is a computer generated cover page.

E-mail Id: seiaa-21.env@hry.gov.in

Subject: EC for Proposed Logistic Park at Plot No 1, Warehousing & Transport Hub in village Patli Hazipur, Tehsil Farukhnagar in Industrial Model Township of Manesar, Gurgaon, Haryana by M/s Instakart Services Private Limited.

This has reference to your proposal No. **SIA/HR/MIS/69653/2021 on 20.12.2021** and subsequent letters dated 27.12.2021 for seeking prior Environmental Clearance (EC) for the above project under the EIA Notification, 2006 along with submission of required affidavits submitted by PP & Consultant as well as scrutiny fee amounting to Rs. 2,00,000/- vide DD. No. 211447 dated 30.11.2021 in compliance of Haryana Government, Environment & Climate Change Notification No. DE&CCH/3060 dated 14th October, 2021. The proposal has been appraised as per prescribed procedure in the light of provisions under the EIA Notification, 2006 on the basis of the mandatory documents enclosed with the application viz., Form-1, Form1-A, Conceptual Plan, EIA/EMP Report and additional clarifications furnished in response to the observations of the State Expert Appraisal Committee (SEAC) constituted by MoEF & CC, GoI vide their Notification dated 30.01.2019, in its meeting held on 25.12.2021 awarded “Gold” rating / grading to the Project.

2. It is inter-alia, noted that the project involves the Logistic Park at Plot No. 1, Warehousing & Transport Hub in village Patli Hazipur, Tehsil Farukhnagar in Industrial Model Township of Manesar, Gurgaon, Haryana.

3. The details of the Project as given below:

Sr. No.	Particulars	
1.	Online Proposal Number	SIA/HR/MIS/69653/2021
2.	Latitude	22° 58' 58.05" N
3.	Longitude	88° 32' 12.86" E
4.	Plot Area	140.01 Acres (56.66 Ha.) 566,664.42 Sqmt
5.	Net Plot Area	Same as above
6.	Proposed Ground Coverage	310,259.275 Sqmt
7.	Proposed FAR	718,605.425 Sqmt
8.	Non FAR Area	57,934.86 Sqmt
9.	Total Built Up area	776,540.285 Sqmt
10.	Total Green Area with %	87975.45 Sqmt (15.53 %)
11.	Rain Water Harvesting Pits	140 pits and 1 RWH pond
12.	STP Capacity	1130 KLD
13.	Total Parking	Car Parking 990 Bike Parking 3650 Truck/Bus Parking 496
14.	Organic Waste Converter	Proposed
15.	Maximum Height of the Building (m)	21 m
16.	Power Requirement	20 MW
17.	Power Backup	7 x 2750 KVA (6x 2750 + 1 x 2750 as backup)
18.	Total Water Requirement	1617 KLD
19.	Domestic Water Requirement	1172 KLD

20.	Fresh Water Requirement	721 KLD	
21.	Treated Water	896 KLD	
22.	Waste Water Generated	997 KLD	
23.	Solid Waste Generated	6.58 TPD	
24.	Biodegradable Waste	3.88 TPD	
25.	Number of Towers	4 Warehouse boxes	
26.	R+U Value of Material used (Glass)	U value 0.9 Btu/hr.ft ²	
27.	Total Cost of the project: 4000 crores	i) Land Cost	406 crores
		ii) Construction Cost	3594 crores
28.	EMP Budget (per year)	i) Capital Cost	During operation:1,185.00 (capital) 132.0 (recurring) 20.0 Socio economic During construction phase 400.00 (capital) 46.0 (recurring)
		ii) Recurring Cost	
33.	Incremental Load in respect of:	i) PM _{2.5}	0.254 µg/m ³
		ii) PM ₁₀	0.295µg/m ³
		iii) SO ₂	2.62µg/m ³
		iv) NO ₂	15.772µg/m ³
		v) CO	4.249µg/m ³
34	Status of Construction	Yet to start	
35.	Constructi on Phase:	i) Power Back-up	490 KVA
		ii) Water Requirement & Source	Private Tanker Treated water
		iii) STP (Modular)	15 KLD
		iv) Anti-Smoke Gun	1

Table 2 :EMP Budget during Operational Phase

S. No	Item	Capital / Investment Cost (RsLacs)	Recurring / Maintenance Cost per year (RsLacs/yr)
1	Sewage Treatment Plant (STP)	300.00	70.00
2	Stacks for DG sets	125.00	1.00
3	Rainwater harvesting system	100.00	5.00
4	DG room enclosure & acoustic treatment	50.00	1.00
5	Solid waste storage bins & organic waste composter	50.00	15.00
6	Tree plantation & landscaping (including Miyawaki Forest)	150.00	30.00
7	Solar lighting / solar panel	400.00	5.00
8	Solar water heating system	10.00	1.00
9	Monitoring / testing (air, noise, water, soil, stack emission, STP effluent, DG noise)	0.00	2.00
10	Six-monthly compliance report of EC conditions	0.00	2.00
	Total during operation stage	1,185.00	132.00
	Socio Economic Activity Budget (0.5% of Project Cost) Activities like smog tower, pond rehabilitation & shelter homes.	20 crores	

Table: EMP Budget during Construction Phase

S. No	Item	Capital / Investment Cost (RsLacs)	Recurring / Maintenance Cost per year (RsLacs/yr)
1	Barricade around construction site	25	
2	Paving of roads / walkways to reduce dust emission	40	5
3	Water sprinkling for dust suppression	0	5
4	Covering of site & excavated soil		5
5	Shed & covering for construction materials	50	
6	Construction of wheel wash bay	20	5
7	Sedimentation trap & storm water management	10	5
8	Housing & Sanitation facilities for construction workers including mobile toilets & drinking water	250	8
9	First aid room and medical facilities for workers	5	5
10	Garbage and debris disposal	0	5
11	Monitoring / testing (air, noise, water, soil, stack emission, STP effluent, DG noise)	0	2
12	Six-monthly compliance report of EC conditions	0	1
	Total during construction stage	400	46

4. The State Expert Appraisal Committee, Haryana after due consideration of the relevant documents submitted by the project proponent and additional clarification furnished in response to its observations, have recommended the grant of environmental clearance for the project mentioned above, subject to compliance with the stipulated conditions. Accordingly, the State Environment Impact Assessment Authority in its **133rd meeting held on 30th -31st December, 2021** decided to agree with the recommendations of SEAC to accord necessary environmental clearance for the project under **Category 8(b)** of EIA Notification 2006 subject to the **strict compliance with the following stipulations depicted below:-**

A. Specific conditions:-

1. The PP shall take the necessary approval from PESO, if applicable
2. The PP shall follow the compliance of Public Liability Insurance Act, 1991
3. The PP shall carry the isolated storage of each chemical to be stored with the existing precautions as per the MSHIC Rules, 1989 and abide by all conditions of MSDS.
4. The Approval of the Competent Authority shall be obtained for structural safety of building code due to earthquakes, adequacy of fire fighting equipment's etc. as per National Building Code including protection measures from lightening etc.
5. The PP shall ensure that total 2% of the cost of project shall be spent on EMP Budget. However, the amount and component shown in EMP table above shall also be included for the purpose of 2% amount. The EMP cost on Socio Economic activities shall be used before the commencement of the project & EMP recurring inside the project shall be implemented throughout the operation of the project.
6. The PP and consultant agree to display the First Aid measure, Fire Fighting Measure, Accidental Release measure, Exposure and control (Personal Measure) at the site.
7. The project proponent shall upload the status of compliance of the basic details (given in above tables), stipulated environment clearance conditions, including results of monitored data on their website and update the same on half-yearly basis.
8. Sewage shall be treated in the STP based on latest Technology with tertiary treatment i.e. Ultra Filtration. The Treated effluent from STP shall be recycled/ reused for flushing. DG cooling, Gardening and HVAC.
9. The PP shall comply with provisions of Occupational Safety health and working conditions Code 2019.

10. The Project Proponent would devise a monitoring plan to the satisfaction of the State Pollution Control Board so as to continuously monitor the treated waste water being used for flushing in terms of faecal coli forms and other pathogenic bacteria.
11. The Project Proponents would commission a third party study on the implementation of conditions related to quality and quantity of recycle and reuse of treated water, efficiency of treatment systems, quality of treated water being supplied for flushing (specially the bacterial counts), comparative bacteriological studies from toilet seats using recycled treated waters and fresh waters for flushing, and quality of water being supplied through spray faucets attached to toilet seats.
12. Separate wet and dry bins must be provided for facilitating segregation of waste. Solid Waste shall be segregated into wet garbage and inert materials. Wet Garbage shall be composted in Organic waste convertor. Adequate area shall be provided for solid waste management within the premises which will include area for segregation, composting. The Inert waste from the project will be sent to solid waste dumping site through authorized vender.
13. The PP shall implement the EMP and assess that the implemented EMP is adequate and periodic environmental audits shall be conducted and maintained the records of audit. These audits shall be followed by Corrective action plan to correct the various measures identified during the audits (CAP).
14. Traffic management plan as submitted shall be implemented in letter and spirit. Apart, a detailed traffic management and traffic decongestion plan shall be drawn up to ensure that the current level of service of the roads within a 05 km radius of the project is marinated and improved upon after the implementation of the project. This plan should be based on cumulative impact of all development and increased habilitation being carried out or purpose to be carried out by the project or other agencies in this 05kms radius of the site in different scenarios of space and time
15. No tree cutting has been proposed in the instant project. A minimum of 1 tree for every 80sqm of land should be planted and maintained. The Existing trees will be counted for this purpose. The landscape planning should include plantation of native species. The species with heavy foliage, broad leaves and wide canopy cover are desirable. Water intensive and/or invasive species should 87975.45 m² (15.63% of plot area) shall be provided for green area development.
16. The PP shall also develop the Miyawaki Forest as proposed in the EMP with the capital cost in the area of 9000sqm. and maintain the same. The Miyawaki forest shall be developed under the guidance of MD Forest corporation Haryana
17. The PP shall develop the pond in consultation with Pond Authority and carry other activities in consultation with administration.
18. The PP shall spent Rs10 Lakhs on various wildlife conservation activities like artificial nests on the trees, digging of ponds and construction of feeding platforms through Environment Management Plan
19. The PP shall provide the Anti-smog gun mounted on vehicle in the project for suppression of dust during construction phase and shall use the treated water, if feasible.
20. The PP shall install the Eco Friendly Green Transformer based on ester oil to reduce the carbon footprint. The PP shall shift to gas based generator set when the gas is available. The PP shall install APCM for the DG set. The PP shall reduce the SO₂ load by 30% if HSD is used.
21. The PP shall not carry any construction below the HT Line passing through the project, if any.
22. The PP shall not carry any construction above or below the Revenue Rasta, if any.
23. The PP shall obtain the permission regarding withdrawal of ground water from CGWA/ State water Authority, Haryana before the start of the project and also obtained the CTO from HSPCB after the approval from CGWA.
24. The PP shall not allow parking of the vehicles on the roads or revenue Rasta outside the project area.
25. The PP shall not give occupation or possession before the water supply and sewage connection permitted by the competent authority
26. The PP shall develop the onsite and offsite emergency plan in consultation with the regulatory authority.
27. 140 Rain water harvesting recharge pits and 1 pond shall be provided for ground water recharging as per the CGWB norms.
28. The PP shall install Digital water level recorder for monitoring the water recharge and carry out quarterly maintenance and cleaning of 140 RWH pits.
29. The PP shall not allow establishment of any category A or B type industry in the project area.
30. The PP shall carry out the quarterly awareness programs for the staff.
31. Any change in stipulations of EC will lead to Environment Clearance void-ab-initio and PP will have to seek fresh Environment Clearance.

32. The PP shall comply with provisions of Manufacturing storage and import of Hazardous chemical rules
33. The PP shall comply the requirements of drugs and cosmetics Rules 1954 as amended from time.
34. That adequate studies have been carried out to ascertain that there would not be any obstruction or impediment in general traffic in vicinity of the project due to the said expansion of the project
35. The no. of in-bound & out-bound vehicles (1000 PCU/Hr.) and the running hours per day (4 hours) of DG sets considered while undertaking the studies for evaluating the “Incremental Pollution Load” and those are true to best of our knowledge.
36. That the proposed & installed DG sets & fuel to be used would be as per NCAP/GRAP.
37. That no untreated water would be released inside or outside the project or anywhere; waste water would be treated to tertiary level & would be used with the installation of “Dual plumbing”.
38. The PP will provide an onsite STP of capacity atleast 1130 KLD for treatment of Waste Water Generation from the project site.

B. Statutory compliance:

- [1] The project proponent shall obtain all necessary clearance/permission from all relevant agencies including town planning authority for ground coverage, FAR and should be in accordance with zoning plan approved by Competent Authority before commencement of work. All the construction shall be done in accordance with the local building byelaws.
- [2] The approval of the Competent Authority shall be obtained for structural safety of buildings due to earthquakes, adequacy of firefighting equipment etc. as per National Building Code including protection measures from lightening etc.
- [3] The project proponent shall obtain forest clearance under the provisions of Forest (Conservation) Act, 1986, in case of the diversion of forest land for non-forest purpose involved in the project.
- [4] The project proponent shall obtain clearance from the National Board for Wildlife, if applicable.
- [5] The project proponent shall obtain Consent to Establish/Operate under the provisions of Air (Prevention & Control of Pollution) Act, 1981 and the Water (Prevention & Control of Pollution) Act, 1974 from the Haryana State Pollution Control Board.
- [6] The project proponent shall obtain the necessary permission for drawl of ground water /surface water required for the project from the competent authority.
- [7] A certificate of adequacy of available power from the agency supplying power to the project along with the load allowed for the project should be obtained.
- [8] All other statutory clearances such as the approvals for storage of diesel from Chief Controller of Explosives, Fire Department, Civil Aviation Department shall be obtained, as applicable, by project proponents from the respective competent authorities.
- [9] The provisions of the Solid Waste (Management) Rules, 2016, e-Waste (Management) Rules, 2016, and the Plastics Waste (Management) Rules, 2016 and Batteries waste (Management Handling Rules 2001 as amended in 2020) shall be followed.
- [10] The project proponent shall follow the ECBC Act/ECBC, Rules prescribed by Bureau of Energy Efficiency, Ministry of Power strictly in addition of bylaws of the State Government.

I. Air quality Monitoring and Preservation

- i) Notification GSR 94(E) dated 25.01.2018 of MoEF&CC regarding Mandatory Implementation of Dust Mitigation Measures for Construction and Demolition Activities for projects requiring Environmental Clearance shall be complied with.
- ii) A management plan shall be drawn up and implemented to contain the current exceedance in ambient air quality at the site.
- iii) The project proponent shall install system to carryout Ambient Air Quality monitoring for common/criterion parameters relevant to the main pollutants released (e.g. PM10 and PM2.5) covering upwind and downwind directions during the construction period.
- iv) Diesel power generating sets proposed as source of backup power should be of enclosed type and conform to rules made under the Environment (Protection) Act, 1986. The height of stack of DG sets should be equal to the height needed for the combined capacity of all proposed DG sets. Use of ultra low Sulphur diesel. The location of the DG sets may be decided with in consultation with State Pollution Control Board
- v) Construction site shall be adequately barricaded before the construction begins. Dust, smoke & other air pollution prevention measures shall be provided for the building as well as the site.

These measures shall include screens for the building under construction, continuous dust/wind breaking walls all around the site (at least 3 meter height). Plastic/tarpaulin sheet covers shall be provided for vehicles bringing in sand, cement, murrum and other construction materials prone to causing dust pollution at the site as well as taking out debris from the site.

- vi) Sand, Murrum, loose soil, cement, stored on site shall be covered adequately so as to prevent dust pollution.
- vii) Wet jet shall be provided for grinding and stone cutting.
- viii) Unpaved surfaces and loose soil shall be adequately sprinkled with water to suppress dust.
- ix) All construction and demolition debris shall be stored at the site (and not dumped on the roads or open spaces outside) before they are properly disposed. All demolition and construction waste shall be managed as per the provisions of the Construction and Demolition Waste Rules 2016.
- x) The diesel generator sets to be used during construction phase shall be ultra-low sulphur diesel type and shall conform to Environmental (Protection) prescribed for air and noise emission standards.
- xi) The gaseous emissions from DG set shall be dispersed through adequate stack height as per CPCB standards. Acoustic enclosure shall be provided to the DG sets to mitigate the noise pollution. Ultra-low sulphur diesel shall be used. The location of the DG set and exhaust pipe height shall be as per the provisions of the Central Pollution Control Board (CPCB) norms.
- xii) For indoor air quality the ventilation provisions as per National Building Code of India.

II. Water Quality Monitoring and Preservation

- i) The natural drain system should be maintained for ensuring unrestricted flow of water. No construction shall be allowed to obstruct the natural drainage through the site, on wetland and water bodies. Check dams, bio-swales, landscape, and other sustainable urban drainage systems (SUDS) are allowed for maintaining the drainage pattern and to harvest rain water.
- ii) Buildings shall be designed to follow the natural topography as much as possible. Minimum cutting and filling should be done.
- iii) Total fresh water use shall not exceed the proposed requirement as provided in the project details.
- iv) The quantity of fresh water usage, water recycling and rainwater harvesting shall be measured and recorded to monitor the water balance as projected by the project proponent. The record shall be submitted to the Regional Office, MoEF&CC along with six monthly Monitoring reports.
- v) A certificate shall be obtained from the local body supplying water, specifying the total annual water availability with the local authority, the quantity of water already committed, the quantity of water allotted to the project under consideration and the balance water available. This should be specified separately for ground water and surface water sources, ensuring that there is no impact on other users.
- vi) At least 20% of the open spaces as required by the local building bye-laws shall be pervious. Use of Grass pavers, paver blocks with at least 50% opening, landscape etc. would be considered as pervious surface.
- vii) Installation of dual pipe plumbing for supplying fresh water for drinking, cooking and bathing etc. and other for supply of recycled water for flushing, landscape irrigation, car washing, thermal cooling, conditioning etc. shall be done.
- viii) Use of water saving devices/ fixtures (viz. low flow flushing systems; use of low flow faucets tap aerators etc.) for water conservation shall be incorporated in the building plan.
- ix) Separation of grey and black water should be done by the use of dual plumbing system. In case of single stack system separate recirculation lines for flushing by giving dual plumbing system be done.
- x) Water demand during construction should be reduced by use of pre-mixed concrete, curing agents and other best practices referred.
- xi) The local bye-law provisions on rain water harvesting should be followed. If local byelaw provision is not available, adequate provision for storage and recharge should be followed as per the Ministry of Urban Development Model Building Byelaws, 2016. Rain water harvesting recharge pits shall be provided for ground water recharging as per the CGWB norms.
- xii) A rain water harvesting plan needs to be designed where the recharge bores of minimum one recharge bore per 5,000 square meters of built up area and storage capacity of minimum one day of total fresh water requirement shall be provided. In areas where ground water recharge is not feasible, the rain water should be harvested and stored for reuse. The ground water shall not be withdrawn without approval from the Competent Authority.
- xiii) All recharge should be limited to shallow aquifer.
- xiv) No ground water shall be used during construction phase of the project.

- xv) Any ground water dewatering should be properly managed and shall conform to the approvals and the guidelines of the CGWA in the matter. Formal approval shall be taken from the CGWA for any ground water abstraction or dewatering.
- xvi) The quantity of fresh water usage, water recycling and rainwater harvesting shall be measured and recorded to monitor the water balance as projected by the project proponent. The record shall be submitted to the Regional Office, MoEF&CC along with six monthly Monitoring reports.
- xvii) Sewage shall be treated in the STP with tertiary treatment. The treated effluent from STP shall be recycled/re-used for flushing, AC make up water and gardening. As proposed, no treated water shall be disposed in to municipal drain.
- xviii) No sewage or untreated effluent water would be discharged through storm water drains.
- xix) Onsite sewage treatment of capacity of treating 100% waste water to be installed. The installation of the Sewage Treatment Plant (STP) shall be certified by an independent expert and a report in this regard shall be submitted to the Ministry before the project is commissioned for operation. Treated waste water shall be reused on site for landscape, flushing, cooling tower, and other end-uses. Excess treated water shall be discharged as per statutory norms notified by Ministry of Environment, Forest and Climate Change. Natural treatment systems shall be promoted.
- xx) Periodical monitoring of water quality of treated sewage shall be conducted. Necessary measures should be made to mitigate the odour problem from STP.
- xxi) Sludge from the onsite sewage treatment, including septic tanks, shall be collected, conveyed and disposed as per the Ministry of Urban Development, Central Public Health and Environmental Engineering Organization (CPHEEO) Manual on Sewerage and Sewage Treatment Systems, 2013.

III. Noise Monitoring and Prevention

- i) Ambient noise levels shall conform to residential area/commercial area both during day and night as per Noise Pollution (Control and Regulation) Rules, 2000. Incremental pollution loads on the ambient air and noise quality shall be closely monitored during construction phase. Adequate measures shall be made to reduce ambient air and noise level during construction phase, so as to conform to the stipulated standards by CPCB/SPCB.
- ii) Noise level survey shall be carried as per the prescribed guidelines and report in this regard shall be submitted to Regional Officer of the Ministry as a part of six-monthly compliance report.
- iii) Acoustic enclosures for DG sets, noise barriers for ground-run bays, ear plugs for operating personnel shall be implemented as mitigation measures for noise impact due to ground sources.

IV. Energy Conservation measures

- i) Compliance with the Energy Conservation Building Code (ECBC) of Bureau of Energy Efficiency as per ECBC Act, 2017 read with ECBC Rules, 2018 shall be ensured. Buildings in the States which have notified their own ECBC, shall comply with the State ECBC also which is no case shall be less than 25% as prescribed.
- ii) Outdoor and common area lighting shall be LED.
- iii) Concept of passive solar design that minimize energy consumption in buildings by using design elements, such as building orientation, landscaping, efficient building envelope, appropriate fenestration, increased day lighting design and thermal mass etc. shall be incorporated in the building design. Wall, window, and roof R & U-values shall be as per ECBC specifications.
- iv) Energy conservation measures like installation of CFLs/LED for the lighting the area outside the building should be integral part of the project design and should be in place before project commissioning.
- v) Solar, wind or other Renewable Energy shall be installed to meet electricity generation equivalent to 1% of the demand load or as per the state level/local building bye-laws requirement, whichever is higher.
- vi) Solar power shall be used for lighting in the apartment to reduce the power load on grid. Separate electric meter shall be installed for solar power. Solar water heating shall be provided to meet 20% of the hot water demand of the commercial and institutional building or as per the requirement of the local building bye-laws, whichever is higher. Residential buildings are also recommended to meet its hot water demand from solar water heaters, as far as possible.
- vii) The PP will submit report indicating compliance of each parameter of ECBC requirement and submit quantification saving report for each component.

V. Waste Management

- i) A certificate from the competent authority handling municipal solid wastes, indicating the existing civic capacities of handling and their adequacy to cater to the M.S.W. generated from project shall be obtained.
- ii) Disposal of muck during construction phase shall not create any adverse effect on the neighboring communities and be disposed taking the necessary precautions for general safety and health aspects of people, only in approved sites with the approval of competent authority.
- iii) Separate wet and dry bins must be provided in each unit and at the ground level for facilitating segregation of waste. Solid waste shall be segregated into wet garbage and inert materials.
- iv) Organic Waste Converter within the premises with a minimum capacity of 0.5 kg/person/day must be installed. Leaves to be put in earmarked pits for converting them into compost to be used as manure.
- v) All non-biodegradable waste shall be handed over to authorized recyclers for which a written tie up must be done with the authorized recyclers.
- vi) Any hazardous waste generated during construction phase, shall be disposed off as per applicable rules and norms with necessary approvals of the State Pollution Control Board.
- vii) Use of environment friendly materials in bricks, blocks and other construction materials, shall be required for at least 20% of the construction material quantity. These include Fly Ash bricks, hollow bricks, AACs, Fly Ash Lime Gypsum Blocks, Compressed Earth Blocks, and other environment friendly materials.
- viii) Fly ash should be used as building material in the construction as per the provision of Fly Ash Notification of September, 1999 and amended as on 27th August, 2003 and 25th January, 2016. Ready mixed concrete must be used in building construction.
- ix) Any wastes from construction and demolition activities related thereto shall be managed so as to strictly conform to the Construction and Demolition Rules, 2016.
- x) Used CFLs and TFLs should be properly collected and disposed off/sent for recycling as per the prevailing guidelines/rules of the regulatory authority to avoid mercury contamination.

VI. Green Cover

- i) No tree can be felled/transplant unless exigencies demand. Where absolutely necessary, tree felling shall be with prior permission from the concerned regulatory authority. Old trees should be retained based on girth and age regulations as may be prescribed by the Forest Department. Plantations to be ensured species (cut) to species (planted).
- ii) A minimum of 1 tree (5' tall) for every 80 sqm of land should be planted and maintained. The existing trees will be counted for this purpose. The landscape planning should include plantation of native species. The species with heavy foliage, broad leaves and wide canopy cover are desirable. Water intensive and/or invasive species should not be used for landscaping.
- iii) Where the trees need to be cut with prior permission from the concerned local Authority, compensatory plantation in the ratio of 1:10 (i.e. planting of 10 trees for every 1 tree that is cut) shall be done and maintained. Plantations to be ensured species (cut) to species (planted). Area for green belt development shall be provided as per the details provided in the project document.
- iv) Topsoil should be stripped to a depth of 20 cm from the areas proposed for buildings, roads, paved areas, and external services. It should be stockpiled appropriately in designated areas and reapplied during plantation of the proposed vegetation on site.

VII. Transport

- i) A comprehensive mobility plan, as per MoUD best practices guidelines (URDPFI), shall be prepared to include motorized, non-motorized, public, and private networks. Road should be designed with due consideration for environment, and safety of users. The road system can be designed with these basic criteria.
 - a. Hierarchy of roads with proper segregation of vehicular and pedestrian traffic.
 - b. Traffic calming measures.
 - c. Proper design of entry and exit points.
 - d. Parking norms as per local regulation.
- ii) Vehicles hired for bringing construction material to the site should be in good condition and should have a pollution check certificate and should conform to applicable air and noise emission standards be operated only during non-peak hours.
- iii) A detailed traffic management and traffic decongestion plan shall be drawn up to ensure that the current level of service of the roads within a 05 kms. radius of the project is maintained and improved upon after the implementation of the project. This plan should be based on
